Install Instructions (Manual)

   Steam Version of the Game

If you want to Install the Mod for the Steam Version of the Game
You will need to do these following Steps:

Step	Description
1	Open the downloaded Commander Survival Kit Version 2.0.6.7z File with Winrar or 7-Zip You should see an **gamedata** and **mods** Folder inside it
2	Copy and paste the **mods** Folder here: C:/Users/**yourusername**/Documents/my games/Gas Powered Games/Supreme Commander Forged Alliance
3	Accept the Dialog to overwrite it if there is already an Mods Folder.
4	Copy and paste the **gamedata** folder here: C:/Program Files (x86)/Steam/steamapps/common/Supreme Commander Forged Alliance
5	Accept the Dialog to overwrite it
6	Start the Game and activate the Mod in the Mod Manager I recommend quitting the game once afterwards and restarting it again
7	Start a Match and Enjoy the Mod

yourusername = Stands for the Name of the current User on your PC.

Retail Version of the Game

If you want to Install the Mod for the Retail Version of the Game
You will need to do these following Steps:

Step	Description
1	Open the downloaded Commander Survival Kit Version 2.0.6.7z File with Winrar or 7-Zip You should see an **gamedata** and **mods** Folder inside it
2	Navigate to the Game Directory where you have installed it The Game Directory is usually called Supreme Commander Forged Alliance. If you open it you should see the bin, gamedata and several other Folders inside it
3	Copy and paste the **mods** Folder into the Game Directory
4	Accept the Dialog to overwrite it if there is already an Mods Folder
5	Copy and paste the **gamedata** Folder into the Game Directiory
6	Accept the Dialog to overwrite it
7	Start the Game and activate the Mod in the Mod Manager I recommend quitting the game once afterwards and restarting it again
8	Start a Match and Enjoy the Mod

Loud Version of the Game

With the Release of the new Love-Loud Launcher by Balthazar you can Load Installed Mods from the Steam Documents Path now
However this requires to do the Install Instructions of the Mod for the Steam Version above first.

If you have done this you can press this following Button: Documents mods disabled

It should look so after you have press it:

After that is Done do Step 5 and 6 below   Documents mods enabled

Alternative If you want to fully Install the Mod in the regular way for Loud
You will need to do these following Steps:

Step	Description
1	Open the downloaded Commander Survival Kit Version 2.0.6.7z File with Winrar or 7-Zip You should see an **gamedata** and **mods** Folder inside it
2	Copy and paste the **mods** Folder here: Steam: C:/Program Files (x86)/Steam/steamapps/common/Supreme Commander Forged Alliance/LOUD/usermods CD: Path Depends where you have Install the Game/Supreme Commander Forged Alliance/LOUD/usermods
3	Copy and paste the gamedata Folder here Steam: C:/Program Files (x86)/Steam/steamapps/common/Supreme Commander Forged Alliance/LOUD CD Path Depends where you have Install the Game/Supreme Commander Forged Alliance/LOUD
4	Start the Game with the Love-Loud Launcher and activate the Mod in the Mod Manager
5	Start a Match and Enjoy the Mod

![FAF logo] **FAF Version of the Game**

The FAF Version of the Game registers whether the Steam or Retail Version of the game is installed.
Depends on which Version you have you can follow the Install Instructions of the Mod for Steam or Retail above to install the Mod.

Important:
You don't need to install the two .scd Files, which are included in the gamedata Folder of the downloaded
Commander Survival Kit Version 2.0.6.7z File for FAF. The Reasons for this are simple First FAF has access to the FAF Coop Campaigns, which have their own Lobby and Second FAF has an integrated support for Custom Lobby Options.

Alternative you can simple Install the Mod from the FAF Modvault as following:

Step	Description
1	Open the FAF Client and Login if needed
2	Navigate to the Mods Tab
3	Write „Commander Survival Kit" into the „Name" Textfield and press the Button „Search" Alternative you can write „CDRMV" into the „Autors" Textfield
4	Click on this Button: to Download and Install the Mod
5	Navigate to the Tab „Play" and then to the Tab „Custom Games" or „Coop"
6	Navigate to the Mods Tab and activate the Mod
7	Start the Match and enjoy the Mod

Official Github Repository

The Commander Survival Kit is of course still not finished with this Major Release.The Mod will still get new Features and Functions in the Future. So if you want to play with the most recent Development Version of the Mod in Early Access you can always download it from the official Github Repository here:

https://github.com/CDRMV/Commander-Survival-Kit

Please follow the Install Instructions on Github to install the Mod correctly.

The Github Repository includes two other Mods of this Project, which are still in Development:
So you can get the Early Access to them as well if you want.

Important:
Keep in Mind that the Github Version of the Commander Survival Kit and the other CSK Mods are Early Access Material.
That means it is not allowed to publish them anywhere without my permission. If you want to use a few of my Units or Functions in your own private Mod please ask me first to let me know to set the Conditions for it. Thank you so much for your understanding.
